TwitTok

A social application for Android & iOS

MOBILE DEVELOPMENT

UI + APPLICATION LOGIC

Project showcase

TwitTok

The idea

A compact social platform inspired by Twitter and TikTok.

MOBILE DEVELOPMENT

Build a mobile app where users can create posts, discover content, follow people and explore location-based Twoks.

Focus: end-to-end application development, user journeys, interface design and backend-connected features.

TWO PLATFORMS

Android

iOS

TwitTok

Core functionality

From publishing a Twok to interacting with other users.

1. Explore the feed
Browse and view Twoks

2. Create content
Compose and publish Twoks

3. Follow users
Explore profiles and follow people

4. Location context
Open maps linked to a Twok

5. Connectivity states
Informative offline indicator

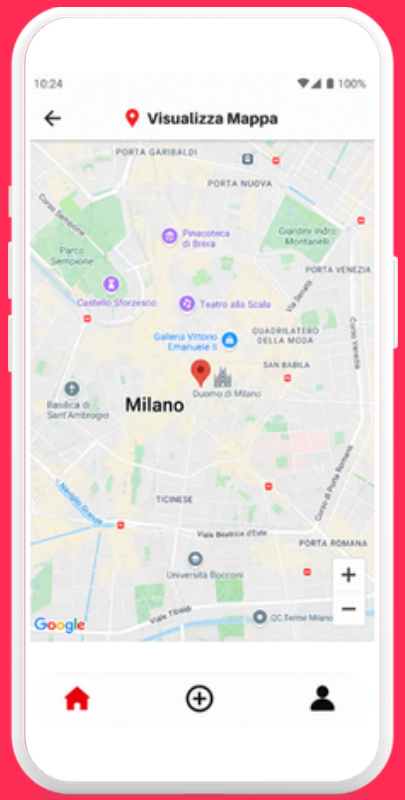

6. Mobile navigation
Move between core app views

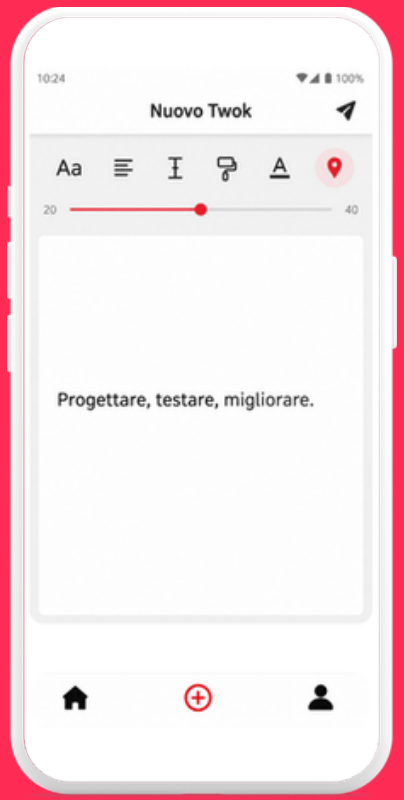

TwitTok

UI CONCEPT

Feed & content creation

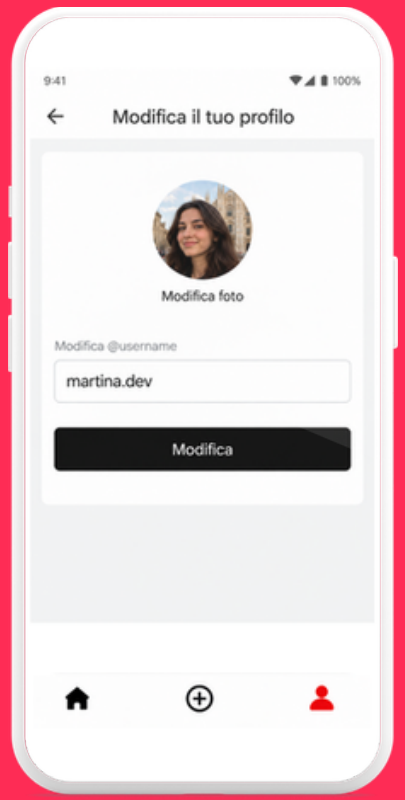

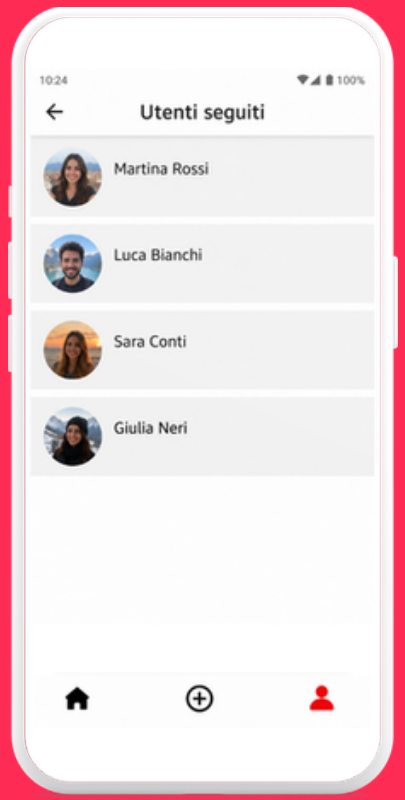

TwitTok

UI CONCEPT

Profiles & followers - connection lost

TwitTok

ENGINEERING

Technical scope

Skills practiced across the mobile application lifecycle.

1. Mobile interfaces
Layouts, navigation and application states

2. Application logic
Actions, flows and user interaction

3. Backend integration
Connecting mobile features to application data

4. Cross-platform thinking
Android and iOS implementation considerations

TwitTok

TAKEAWAYS

Technologies

KEY SKILLS

- Mobile developement
- UI Developement
- Backend Integration

iOS

- React Native
- Node.js

ANDROID

- Java
- Android studio
